Innovation Data Processing

**Extend Mainframe Business Resiliency
to Open System Data Protection
FDR/UPSTREAM...**

FDR/UPSTREAM... delivers reliable, high-speed cross platform AIX, Linux, Solaris, UNIX and Windows backup to disk/tape, with support for active databases, VMware Consolidated Backup (VCB) and data de-duplication to meet enterprise business data protection obligations.

Leverage the use of existing mainframe tape/disk, tape management, job scheduling and z/OS RACF security to reduce open system backup downtime and implement rapid recovery from disk.

FDR/UPSTREAM employs mainframe network connectivity to extend mainframe resiliency for reliable high-speed cross platform data protection and rapid recovery.

A Java DIRECTOR and ISPF menus for policy management combine to provide administrators with a graphic view and the ability to centralize backups while providing enterprise data protection with maximum safety and superior recovery.
